Deadline definitions

- ¹ Without risk deadline: Theses submitted by this day have a very high likelihood for graduation that semester if required formatting changes are not excessive, and the formatting changes are completed quickly.
- ² At risk deadline: Theses can be submitted until this day, but are not guaranteed for graduation that semester.
- ³ Avoid 799B deadline: Theses submitted by this day will not require 799B registration in the following semester, even if the degree cannot be issued until the following semester.
- ⁴ Strict publication deadline: Theses must be approved, paid for and published before noon on this day, or the degree cannot be issued until the following semester. **This is a strict deadline.**
