(upper division)						
Other Advanced Computer Science or Programming						
(upper division)						

Have you, either by yourself or with one or two other students, designed an empirical study in which
you did the following: manipulated variables for an experiment (or chose variables for a research
question), collected data (or used archival data), analyzed the data, and presented it in an APA-style
paper?
paper?

Yes	No
-----	----

If yes, please specify the context of the experience. If the above experience was not acquired in the context of a course, explain the circumstances in which it was acquired (e.g., job in a research lab).
